

The dual system of education

is a modern way of preparing students for a profession in which students learn how to transform theoretical knowledge into practical skills directly at the employer's workplace. Every student concludes a teaching contract with the employer from whom he will acquire professional skills.

Classes are organized in 2-week cycles - 4 days theoretic lessons at school and 6 days practical training at the employer's workplace.

Benefits:

- practice in the workplace of companies
- Corporate Scholarship
- earnings - 50% of the minimum hourly wages during studies
- provision of board, working clothes, compensation of transport costs, accommodation in the school dormitory
- specialized professional excursions
